Anantapur, Andhra Pradesh-515001

9th - 10th Nov, 2024
CONFERENCE AT
Sree7 Convention
Door No:-11-41,Beside Uma Godowns,
Anantapur, Andhra Pradesh 515001

IAP, Anantapur

Purpose & Objectives

“The unfamiliar was familiar because it had been encountered many times before”.

Simulation training was pioneered by the aviation industry in the early twentieth century and used extensively by military organizations to try to reduce error and improve team performance.

Pediatric emergency simulation based course would include multiple areas of training including emergency case scenarios, communication, teamwork and human factors training.

TIPS workshop provides simulation training to train in a realistic manner on pediatric emergencies. It helps to reduce clinical errors and addresses patient safety issues. It helps to develop team work and effective communication skills.

At the conclusion of this activity, participants would be able to improve their understanding and confidence in responding to pediatric emergencies.

This workshop is mainly intended towards pediatricians involved with pediatric emergency.
